THE ELECTROMAGNETIC VIBRATING FEEDERS

FLOW CONTROLLED AT 100%

- Suitable for all industries
- Transport or dosing of bulk or powdered products
- Continuous flow control
- Custom design

FEATURES

WIDTH

250 mm to 1200 mm

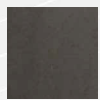

LENGTH

400 mm to 4500 mm

FLOW RATE

0 to 200 m³ /h

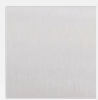

CONSTRUCTION MATERIALS

Steel

Stainless Steel 304L

Stainless Steel 316L

AVAILABLE IN FOOD-GRADE QUALITY

- Continuous welding
- No retention zones
- No hollow bodies

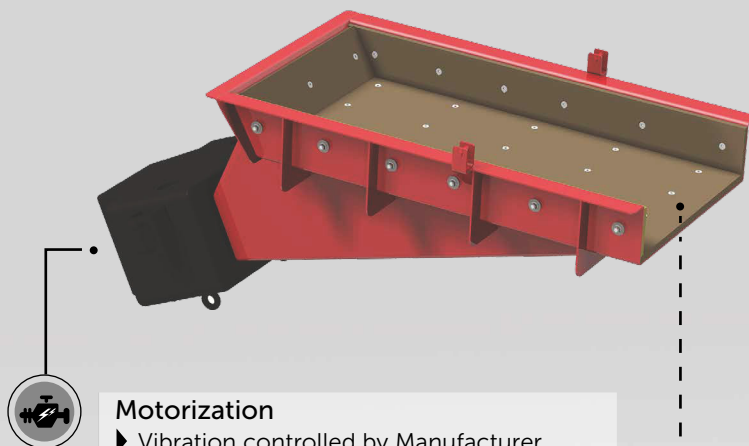

Open design

Dustproof design

Construction

- ▶ Steel or stainless steel construction according to your requirements
- ▶ Installation: hanging or placed
- ▶ Compatible with weighing systems (no disruption of reading with device included in tare weight)

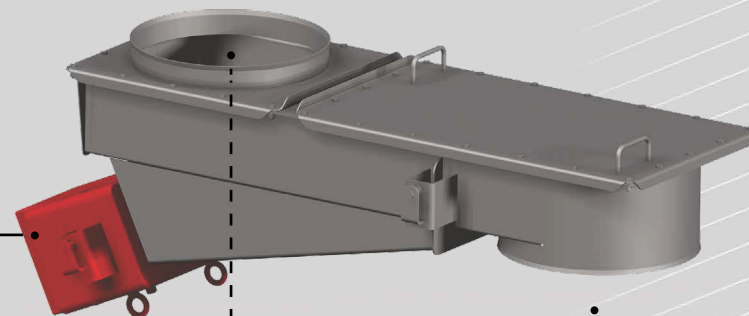

Motorization

- ▶ Vibration controlled by Manufacturer Electronics.
- ▶ Continuous flow variation from 0 to 100%.

Coating

- ▶ Non-sticking or wear-resistant linings available, on request

Product inlet and outlet

- ▶ Connections & sleeves tailored to your needs.
- ▶ Dustproof design available in High Hygiene

Motorization

- ▶ Vibrator positioned below or above the device as per your needs
